

STIpot.com for the Academic mobility 2.0

STIpot is a unique platform for scientific and academic mobility which accumulates data about scientific and pedagogical staff to assist students and young scientists in searching for scientific advisers abroad.

STIpot is an accelerator of professional scientific and pedagogical mobility, designed to optimize foreign business travel and find new areas of cooperation.

STIpot accumulates data about scientific and educational organizations and its employees permitting them to attract thousands of international fellows and interns for study or research.

STIpot is an up-to-date database of foreign scholarships and grants.

Be the first to know about the estimated visits of international experts to your city and negotiate to make mutual joint events (e.g. conferences, lectures, seminars, consultations, etc.).

STIpot service includes:

- promotion of the organization and its employees;
- recruitment of foreign young scientists and students for internship, training and research financed by the grants;
- support of **12 languages**;
- popularization of research and development results;
- updated database of internships and other academic mobility programmes for students and staff in leading organizations and laboratories around the world, including your ones;
- notification system about the expected visits of international experts to your city with an integrated messenger and an overview of the scientific profile of the expert;
- integrated communication system
expert ~ organization ~ expert / student ~ expert ~ student;
- international standards for the protection of personal data.
